

Entering Modality Changes into CROWNWeb

FYI: CROWNWeb will require name of doctor, and if patient is changing to hemodialysis CROWNWeb will require you to enter Sessions per Week, and Time per Session (in minutes).

1. Click Patients tab
2. Enter Patient SSN or other identifier to pull up correct patient
3. From patient results screen click on patient's CROWN UPI
4. From next screen click Admit/Discharge Summary (found in left margin)
5. Click on Treatment Summary
6. Click Add Treatment
7. Enter info into all required fields and click submit
