

The Network #15 Data Department presents the

Telephonic Open Participation Information Call (TOPIC)

It's Timely!

In 2006 Network #15 began hosting conference calls designed to improve the quality, accuracy, and timeliness of the data that we receive. These calls provide an opportunity for facilities to learn about CMS/Network requirements and to open up discussions between facilities and the Network. Past topics have included :

It's Relevant!

- CMS Compliance
- Forms Completion
- Reporting Patient Activities
- CROWNWeb
- Year End Reporting

It's Topical!

Join the next TOPIC call and learn something you might not know about data reporting or ask a question of the Network Data Staff. Calls are usually conducted every other month. For more information, or to hear a replay of this month's TOPIC call, go to <http://www.esrdnet15.org/data.htm>.
